AIPSO Condemns US Plan to Destabilise Cuba

The National Secretariat of the All India Peace and Solidarity Organisation (AIPSO) condemns the US efforts to intervene in the internal affairs of socialist Cuba and destabilise the country. The US had similarly tried to instigate people to rise against Cuban government in July and failed. Not learning any lessons, it is once again trying to instigate people to riot in Cuba. The AIPSO is confident that all these attempts will not succeed and will be suitably rebuffed by the heroic people of Cuba.

Cuba is an inspiration to the entire world because of its humanitarian and internationalist approach. Whenever any country is in crisis, it was Cuba that immediately sent humanitarian assistance, particularly through its famed medical personnel. The world is witness to such services during the Ebola epidemic in Africa and now the Covid-19 pandemic. Many countries in Latin America, Africa and even developed countries in Europe benefited from the services of Cuban medical personnel. It is because of such an altruism that Cuban medical brigades were recommended for the Nobel Peace Prize by many eminent personalities throughout the world. On the other hand, people also witnessed the failure of many a developed country in containing the spread of the Covid pandemic and saving the valuable lives of their own country people. It is this stark contrast that makes Cuba stand apart from the comity of world nations.

Cuba is able to achieve progress in education and health sectors because of the farsightedness and vision of Commander-in-Chief Fidel Castro, the historical leader of Cuban revolution. It is also due to Comrade Fidel Castro's insistence that environment and climate change became a priority for the entire world today. Cuba is one of the few countries in the world that provides free education and health care to its entire people without any discrimination.

Cuba was able to achieve all this progress overcoming many obstacles imposed by US. Cuba is subjected to one of the most inhuman economic blockades in the world history. The UN had denounced the US imposed economic blockade many times with overwhelming majority. Still, in violation of various UN resolutions and defying world public opinion, US is continuing with its blockade and recently further tightened it. Many new items are added to the blockade and the Title III of Helms-Burton Act was invoked to strangulate Cuba. Key equipment and ingredients to develop medicines and provide health care are stopped from reaching Cuba.

In spite of all these measures and overcoming many difficulties, Cuba succeeded in producing three vaccine candidates and successfully administered at least one vaccine dose to 100 percent of its above 2 years population. This signifies the resoluteness of the people of Cuba and the pro-people character of the Cuban government and social system.

Having failed in all its earlier attempts, US imperialism is once again trying to incite people by spreading false news through various internet platforms. The AIPSO is confident that Cuban people will see through all these imperialist designs and defeat these attempts.

AIPSO always stood with Cuba and its people. Cuban people successfully overcame the Playa de Giron invasion, the Special Period of the 1990s and the recent destabilisation efforts in July. AIPSO is against all sorts of external interference, destabilisation efforts and imperialist aggression. AIPSO reiterates its solidarity with the people of Cuba and promises its wholehearted support in their efforts to fight and resist imperialist intervention in their country.

Viva Cuba
Viva World Peace
Down with US intervention
Down with Imperialism
